PROFESSIONAL EXPERIENCE

Operations Manager

2024–Present

Lawyer's Aid Service, Inc., Austin, TX

- Manage and support production applications including CRM, document management systems, and client portals—diagnosing issues, performing root-cause analysis, and resolving incidents to ensure 99.9% uptime.
- Interact with SQL databases to investigate data issues, run queries, and restore normal operations for internal teams and clients.
- Engage directly with internal stakeholders to understand requirements, reproduce problems, and deliver solutions that improve accuracy and efficiency.
- Create and maintain troubleshooting guides, internal documentation, and repeatable processes to reduce ongoing support load.
- Collaborate with development teams to support deployments, assist in UAT testing, and verify successful releases.

Freelance Full Stack Web Developer

2022–Present

AzTech Solutions, Remote / Austin, TX

- Developed and maintained web applications using Python, JavaScript, SQL, and C/C++—supporting full software development lifecycle from requirements to deployment.
- Automated client workflows by integrating REST APIs for state filings and CMS platforms, handling errors and parsing results effectively.
- Deployed scalable solutions via Azure and cloud platforms, monitoring performance and resolving production issues.
- Implemented secure authentication and authorization—sanitizing user inputs and protecting secrets in production environments.

Fitness Consultant

2021–Present

El Mar Fitness LLC, Remote / Austin, TX

- Designed and delivered tailored solutions for clients, managing projects independently and prioritizing backlog items based on business impact.
- Oversaw full business operations—including client acquisition, reporting, and compliance—demonstrating strong communication and problem-solving skills.

PROJECTS

marshallbenson.com

Nov 2024–Mar 2025

Full-Stack Web Application

- Built secure full-stack application with custom CMS, authentication, and role-based access control.
- Integrated Azure Web App + SQL Server backend, improving content deployment speed by 50% and ensuring reliable uptime.
- Implemented input validation and security best practices to protect sensitive content.

elmarfitness.com

Feb 2023–Present

Business Website

- Launched platform with automated scheduling, email campaigns, and third-party API integrations.
- Perform routine health checks, monitor system behavior, and proactively address performance issues.

HomeLab

2024–Present

Custom Home Server with Remote Access and Local LLM

- Implemented Flask APIs, Tailscale, and RustDesk for secure remote access and low-latency streaming.
- Troubleshoot and resolve technical issues across Linux and Windows environments.
